

AffinityLive Project

User Manual

Nan Noon Noon

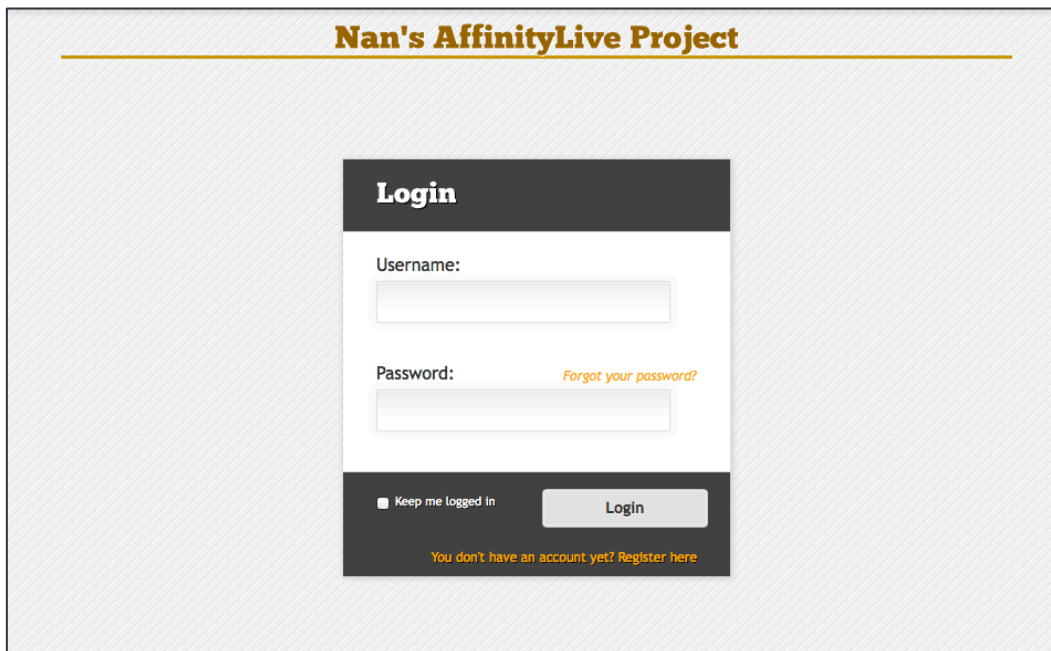

2nd Mar 2014

1. Introduction

This project will provide web application interface and it will allow user to login to system, send overdue tasks to yammer feed. And also allow user to see feeds from yammer and post any message to yammer feed.

2. Login

This application allow user to login with their username and password. For testing you can use username: admin and password: admin.

The screenshot displays the login interface for 'Nan's AffinityLive Project'. At the top, the project name is centered in a bold, dark blue font, underlined by a thin blue line. Below this, a central white box with a subtle gray border contains the login form. The form has a dark gray header with the word 'Login' in white. It includes two input fields: 'Username:' and 'Password:'. To the right of the password field is a link that says 'Forgot your password?'. At the bottom of the form, there is a checkbox labeled 'Keep me logged in' and a gray 'Login' button. Below the button, a link reads 'You don't have an account yet? Register here'.
